**Chemical Vapor Intrusion Expert Joins Protect Environmental to Lead Products Team**

*With a diverse background in scientific academia, manufacturing, and the environmental industry, Dr. Chris Bonniwell to head product portfolio focused on radon and chemical vapor intrusion management*

Louisville, KY, March 10, 2020 – Protect Environmental announced today the addition of Chris Bonniwell, Ph.D. as Director of Products. Dr. Bonniwell joins Protect Environmental after approximately 10 years in the environmental consulting industry in Indiana and Wisconsin, which were preceded by four years as an environmental regulator at the Indiana Department of Environmental Management and seven years managing an industrial manufacturing company in Wisconsin. During his tenure as an environmental regulator and consultant, Dr. Bonniwell provided technical oversight to hundreds of projects in the assessment and remediation of environmental impacts from metals, petroleum compounds, PCBs, and chlorinated solvents. Dr. Bonniwell is a licensed professional geologist in Wisconsin and Indiana, with a consulting career heavily focused on projects with complex chemical vapor intrusion issues, a field in which he is considered a subject matter expert.

As the Director of Products, Dr. Bonniwell will be responsible for managing the product portfolio of the company, including the development, production, and marketing of products for use in the assessment, mitigation, and ongoing management of radon and chemical vapor intrusion contaminated properties. These products include the Vapor Sentinel Remote Environmental Monitoring System, which was awarded patent protection in January of 2020 ([press release](#)). The addition of Dr. Bonniwell will include the establishment of an office in the Greater Milwaukee area (Cedarburg) to bolster the company's presence in the upper Midwest.

"Having firsthand experience with the technical expertise and cost effectiveness Protect Environmental delivers to its clients, I am excited to be joining the team," Dr. Bonniwell said. "I look forward to working to deliver products and solutions that directly impact the health and well-being of so many," he added.

"Attracting someone with the background in scientific academia, manufacturing, and environmental consulting Dr. Bonniwell possesses is a real coup for our company," said Kyle Hoylman, Managing Partner of Protect Environmental. "Chris is widely regarded in the industry as an expert in chemical vapor intrusion, which makes him a natural fit to champion our products portfolio," Hoylman added.

**About Protect Environmental**

Protect Environmental is a leader in the environmental consulting and construction industry, focusing on radon and chemical vapor intrusion management. With a proven track record spanning 15 years and more than 15,000 completed projects across the country, the company provides expert service from its trusted professionals to provide peace of mind protection to property owners seeking efficient and effective management of environmental risks and liabilities.
