Kyle Hoylman Named President of the American Association of Radon Scientists and Technologists

Industry association members elect seasoned veteran to lead organization during important time of tremendous opportunity and growth

Louisville, KY, November 16, 2020 – Protect Environmental announced today the election of Kyle Hoylman, its Managing Partner, to serve as president of the American Association of Radon Scientists and Technologists (AARST). The announcement comes after the annual meeting of the association held during the 2020 International Radon Symposium. As president of the organization, Hoylman will work with the AARST staff and board of directors to continue the implementation of the strategic plan of the organization. He will immediately assume the position, serving for a period of two years.

“I’m humbled by the vote of confidence from my industry colleagues to lead the organization during this important time of tremendous opportunity and growth,” said Hoylman. “I look forward to continuing the work of AARST in preventing radon-induced lung cancer and saving lives through increasing public awareness, raising industry professionalism, and supporting effective radon policy,” he added.

Hoylman brings over 15 years of experience in the radon and chemical vapor intrusion industry, serving as Managing Partner of Protect Environmental. Under his leadership, the company has grown into one of the largest environmental consulting and construction firms focusing on radon and chemical vapor intrusion in the country. He has been heavily involved within the AARST organization over the past decade, including serving on its board of directors, where he chaired the government affairs committee. He also chairs the executive stakeholder committee of the AARST Consortium on National Radon Standards, which oversees the ANSI/AARST national consensus radon standards recommended by the US EPA.

About Protect Environmental

Protect Environmental is a leader in the environmental consulting and construction industry, focusing on radon and chemical vapor intrusion management. With a proven track record spanning 15 years and more than 5,900 completed projects across the country, the company provides expert service from its trusted professionals to provide peace of mind protection to property owners seeking efficient and effective management of environmental risks and liabilities.
