**Protect Environmental Completes Acquisition of Reliant Radon Solutions**

*Acquisition amplifies Protect Environmental's national footprint by expanding capacity in metropolitan Denver and throughout Colorado*

Louisville, KY, October 11, 2022 – Louisville-based Protect Environmental, a national leader in the environmental consulting and construction industry, with a focus on radon and chemical vapor intrusion management, today announced its acquisition of Reliant Radon Solutions. After acquiring Denver-based ACE Radon earlier this year, the company is continuing to expand its capacity to serve Colorado and the western United States.

Founded in 2003, Reliant Radon Solutions has focused on building trust with residential and commercial customers seeking radon testing, mitigation, and monitoring in Colorado and throughout the western region of the country. Terry Kerwin, owner of Reliant Radon Solutions, says of the acquisition, "Over the years we've been committed to our community through providing education and quality services, and I'm honored to join the Protect Environmental family to continue this commitment in the communities we serve."

Coupled with the acquisition of ACE Radon, the expanded operation is the largest, most experienced soil gas contractor in the state of Colorado. "Reliant Radon Solutions has always been a strong competitor in the market, which is why we are excited to join forces to amplify our ability to serve the Denver area and beyond," said Jeff Goard, Director of Colorado Operations.

As part of the acquisition, Kerwin will transition to a national role within the company, leading its market development team and supporting its national accounts team. "We are excited to welcome Reliant Radon Solutions to Protect Environmental's growing family, particularly given the alignment with our core values and vision," said Kyle Hoylman, CEO of Protect Environmental. "I look forward to working with Terry on the national level to assist our clients with building and maintaining healthy, safe, and sustainable indoor environments in the communities where we live, work, and learn."

**About Protect Environmental**

Protect Environmental is a national leader in the environmental consulting and construction industry, focusing on radon and chemical vapor intrusion management. With a proven track record spanning 18 years and more than 200,000 completed projects in all 50 U.S. states and 2 U.S. territories, the company provides expert service from its trusted professionals to provide peace of mind protection to property owners seeking to build and maintain healthy, safe, and sustainable indoor environments.
